## Norvaline [760-78-1]

The L-isomer has been assumed unless otherwise specified or implied in the original document and is indexed at L-Norvaline [6600-40-4]. When synthetic norvaline has been clearly indicated in the original document, the racemate has been assumed and is indexed at this heading. These assumptions have also been made for their N-substituted derivs. and for their unsubstituted and N-substituted acid derivs. (e.g., esters, hydrazides)

Studies of salts of aluminum, beryllium, gallium, indium, magnesium, thallium and the transition metals are indexed at the headings of these metals. Other metal salts are indexed under this heading
